JOB CONSOLE - ENHANCEMENT

INTRODUCTION

We are pleased to announce several enhancements to the Job Console screen that improve the visibility and management of job priorities. These enhancements will help you quickly identify, filter, and group jobs based on their priority, making your workflow more efficient and organized.

ENHANCEMENTS

1. **Display priority information with icons:**

   o The Job Console main screen now displays priority information using different icons for each job priority. This visual aid allows you to quickly assess the importance of each job at a glance.

2. **Job priority as a filter option:**

   o You can now filter jobs in the Job Console screen by their priority. This feature helps you focus on high-priority tasks and manage your workload more effectively.

3. **Grouping by job priority:**

   o Jobs can now be grouped based on their priority on the Job Console screen. This grouping helps you organize your tasks more logically and ensures that high-priority jobs are addressed promptly.

4. **Legends for job priority icons:**

   o The Job Console screen includes a legend that displays the different job priority icons. This legend helps you understand the meaning of each icon and quickly interpret the priority of each job.

Benefits

- **Improved visibility:** Quickly identify job priorities with clear icons, ensuring that high-priority tasks are not overlooked.

- **Enhanced filtering:** Use job priority as a filter to manage your tasks more efficiently and focus on what's most important.

- **Better organization:** Group jobs by priority to maintain a more organized and manageable Job Console.

- **Quick reference:** Use the legend for easy reference to understand the priority icons, making the console user-friendly and intuitive.

USER CONSOLE - ENHANCEMENT

INTRODUCTION

This release document outlines the new enhancements to the User Console screen that provide corporate users with greater flexibility and efficiency in managing property access and roles for users within a chain. These enhancements simplify the process of sharing properties and assigning roles, allowing for quicker and more efficient user management.

ENHANCEMENTS

1. **Share properties across a chain:**

   o Corporate users can now share any property within a chain to any user directly from the User Console screen. This enhancement makes it easier to manage property access across multiple locations.

2. **Role assignment for shared properties:**

   o The screen can be used to assign roles for each shared property. This enhancement ensures that users have the appropriate permissions and access levels for each property with which they are associated.

Benefits

- **Increased efficiency:** Simplifies the process of sharing properties and assigning roles, saving time and effort for corporate users.

- **Enhanced user management:** Allows for quick and efficient management of user access across multiple properties within a chain.

- **Improved accessibility:** Ensures that users can access shared properties quickly and with the appropriate roles, enhancing their ability to perform tasks effectively.

HELP US IMPROVE

We value your input and want to hear from you! As we continue to enhance Unifocus products, we invite you to share your questions, suggestions, and feedback with us. If you have any thoughts or ideas on how we can improve our products, please don't hesitate to reach out to us at product@unifocus.com or Ideas Portal (aha.io).
