## Overview

This document contains release notes for the latest Survey release.

## Improvements and new features

This release includes the following improvements and new features:

### USER ADMIN FEEDBACK

- **Search function should be case-insensitive:** The search function is no longer case-sensitive, allowing users and administrators to search for users without being restricted by capitalization. This improvement enables seamless user lookup, disregarding the need for an exact match in capitalization within login IDs.
- **Reorder tabs:** This feature allows user administrators to reorder tabs in a way that enhances the logical flow of information when configuring users. This ensures a more intuitive and efficient user experience for administrators managing user settings.

### LOCATION RANKING - GUESTSCOPE ENHANCEMENT

- **Enhancements to location ranking:** These enhancements optimize the user experience, streamline data presentation, and offer comprehensive insights within the location ranking functionality.

### STAFFSCOPE- COMMENT ANALYSIS

- **STAFFScope - Comment Analysis - UI for setting screen:** These UI adjustments optimize the Settings screen, providing users with a more intuitive and efficient experience while configuring location ranking parameters. The changes enhance data clarity, visualization, and overall usability within the specified screen.

### PROJECT ACTIVITY - GUESTSCOPE/MEETINGSOPE

- **MEETINGScope Project Activity - Layout creation for Setting screen:** Settings screen layouts can now be created for MEETINGScope Project Activity. This involves designing and implementing the visual arrangement of elements and controls on the screen, ensuring a user-friendly and intuitive interface for configuring MEETINGScope project settings.
- **MEETINGScope Project Activity - Data in data table:** The data table can now be retrieved for MEETINGScope Project Activity. This involves obtaining and organizing the necessary data to be displayed in the grid component, ensuring that the information is accurately presented and can be efficiently interacted with by users.

## INTERFACE PROCESSOR

- **GUESTScope, important actions, events, and errors should be logged into database:** - GUESTScope now logs important actions, events, and errors into the database for comprehensive tracking and analysis.
- **Errors should be logged in Interface log table when Email format is wrong:** If an email format is detected as invalid, a warning or error message should be logged in the Interface Log table.
- **GUESTScope supports multiple properties data in one file:** GUESTScope now supports the processing of guest details for multiple properties in a single file. This functionality will be specified in the database table sqsdb interface.
- **When a PDF is uploaded, the previous file's data is saved:** This feature preserves the data from the previous file when a PDF file is uploaded. It ensures that the existing data is retained when a new PDF is introduced.
- **Survey clients' guest data is processed into Unifocus so that surveys can be distributed:** For Survey clients, guest data is processed into Unifocus software, facilitating the distribution of surveys. This functionality is crucial for Survey clients who rely on Unifocus for survey management and analysis.

## NON-RATED QUESTIONS - GUESTSCOPE ENHANCEMENT

- **Responses with the same name but different IDs are now displayed on the UI:** Previously, responses with identical names and different IDs were not visible on the UI. Now, the UI displays all responses, even those with the same name but different IDs.
- **The user should be able to send the survey response from Question Dashboard:** Users can now send survey responses directly from the Question Dashboard. This functionality streamlines the survey response process and enhances user convenience.
- **The Surveys Taken count should only display the completed surveys count:** The Surveys Taken count displayed on the UI now accurately reflects only completed surveys. The count excludes any surveys that are in progress or not yet completed.
- **Non-Rated Questions – Corrected columns placement:** The column layout for Non-Rated Questions has been corrected. This adjustment ensures a proper and organized presentation of data in the UI, improving the overall user experience.

## AD HOC REQUEST

- **Private Event Survey – relevant categories in comment search:** Comment search functionality now accurately reflects relevant and appropriate categories, resolving any discrepancies or anomalies that might be present in the current implementation. This enhancement provides users with a more accurate and reliable experience when searching for comments within the specified survey.

## Coming soon

These improvements, new features, and fixed issues will be delivered in an upcoming release.

### INTERFACE PROCESSOR

- **Survey clients' guest data will be processed into Unifocus software so that surveys can be distributed:** This improvement facilitates the distribution of surveys and ensures that Survey clients can seamlessly integrate their guest data with Unifocus, a critical step in enabling the efficient distribution and management of surveys. The objective is to meet the clients' need for a streamlined process that enhances the survey distribution workflow within the Unifocus platform.

### PROJECT ACTIVITY -GUESTSCOPE/MEETINGSCOPE

- **STAFFScope Activity Report - Columns and label changes in the Project Activity by department screen:** The Project Activity by department should display the Department and Subdepartment of QR Code or Survey Code enrollment for the current survey period.
- **STAFFScope Activity Report - Columns and label changes in the pProject Activity by project activity details screen:** The Project Activity details by department should include the Survey Code, Department, and Subdepartment of QR Code or Survey Code enrollment for the current survey period.
- **STAFFScope Activity Report - Columns and label changes:** The Surveys Ordered section should display the codes ordered count, irrespective of QR Code or Survey Code enrollment for the current survey period.
- **STAFFScope Survey Code Download Page - Label change:** In the STAFFScope Survey Code Download Page, the label "Start Date" will be changed to "Launch Date," aligning it with the label change made in the Activity Report. This ensures consistency and clarity in terminology across the platform.

### ENHANCEMENT- GUESTSCOPE

- **Logout and other buttons/options will be removed from legacy software when it is running in Desktop Launcher:** When the legacy GUESTScope software is running in Desktop Launcher, the Logout button and other associated buttons/options will be removed from the purple bar. This adjustment is necessary to optimize the user experience by eliminating unnecessary options when the software is accessed through the Desktop Launcher. The implementation should be thoroughly checked and resolved within the Partner Solution site to enhance the application's functionality and alignment with user expectations.

## USER ADMINISTRATION

- **Easily identify who is a security admin:** Users will soon be able to quickly identify Security administrators within the [ST] system through a visible indicator on the main users' page, eliminating the need to navigate to individual user details for this information. This enhancement improves user efficiency and streamlines the recognition of security administrators.

## USER SETUP

- **Property selected in settings and lower-right property in the Welcome Page are not matching:** The property selected in Settings will match the property displayed at the lower-right corner of the Welcome Page to ensure consistency and accuracy.

## Help us improve

We value your input and want to hear from you! As we continue to enhance Unifocus products, we invite you to share your questions, suggestions, and feedback with us. If you have any thoughts or ideas on how we can improve our products, please don't hesitate to reach out to us at [product@unifocus.com](mailto:product@unifocus.com).
