Overview

This document contains release notes for the latest Survey release.

Improvements and new features

This release includes the following improvements and new features:

PROJECT ACTIVITY-GUESTSCOPE /MEETINGSCOPE /STAFFSCOPE

- **Display blank instead of “NaN” in Total Response Rate column:** This improvement enhances the user interface in the GUESTScope Project Activity within the Survey reports by ensuring that a blank space is displayed instead of “NaN” in the Total Response Rate column.
- **Locations are hidden after selection in settings modal:** This feature addresses the issue where selected locations are hidden after the selection process in MEETINGScope Project Activity within the Survey reports. The goal is to ensure that locations remain visible and selected without any interruptions in the settings modal.
- **Corrected a display error:** This feature addresses an error that occurred in the Survey reports when attempting to change the project from "casino cards" to "front desk cards" in the settings modal. The error message Item with id=3 has a parent set but could not find any displayed items.

STAFFSCOPE- COMMENT ANALYSIS

- **The screen title should be changed to “Comment Analysis” instead of “Commonly Used Words”:** The new feature, “Comment Analysis,” replaces the previous screen title, “Commonly Used Words.” This enhancement provides users with a more intuitive and descriptive representation of the functionality offered within this section.

ENHANCEMENT - GUESTSCOPE

- **New GUESTScope Dashboard navigation:** This enhancement ensures that users have clear and organized navigation, making it easy to access the desired modules based on their needs. Introducing a comprehensive left navigation to streamline the user experience.

USER ADMIN FEEDBACK

- **Users record updates:** This improvement enables the seamless synchronization of user login ID updates throughout the software.
- **Audits enhancement:** Auditing functionality has been improved to prevent errors that users encountered when trying to access audits for records without a record ID.

Fixed issue

- **GUESTScope Dashboard - GUESTScope Sample Survey error:** This display error has been resolved.

Coming soon

These improvements, new features, and fixed issues will be delivered in an upcoming release.

USER ADMINISTRATION

- **Disable all hyperlinks contained in the emailed notifications for GUESTScope and MEETINGScope:** This feature will remove all hyperlinks within the emailed notifications. The goal is to eliminate any links leading to the partner platform and present information as plain data.

USER ADMIN FEEDBACK

- **Survey-only users in User Administration:** This improvement will address the issue of Survey-only users causing complications in the User Administration user interface. New features and improvements will streamline the management of survey-only users, ensuring a more organized and efficient user administration process.

PROJECT ACTIVITY- GUESTSCOPE /MEETINGSCOPE /STAFFSCOPE

- **Column and label changes in project activity by project activity details:** The Project Activity details by department should now include the Survey Code, Department, and Subdepartment of QR Code or Survey Code enrollment for the current survey period.

STAFFSCOPE- COMMENT ANALYSIS

- **Reset functionality is not working under settings modal:** This feature aims to fix the issue related to the reset functionality under the settings modal.
- **Apply button is enabled even after deselecting the Locations and Date Range on the settings modal:** This feature aims to enhance the settings modal by addressing these issues for improved usability.

ACTIVITY REPORT – STAFFSCOPE

- **Display email sent, codes ordered, total count and total completion percentage column as 0 where it is showing blank:** This enhancement aims to improve the user experience by providing a more consistent and informative display of survey data, even in the absence of certain metrics.
- **Ordered display codes and correct total percentage:** Addressing this issue will enhance the accuracy and interpretability of survey reports, providing users with a more reliable representation of survey data.
