OVERVIEW

This document contains release notes for the latest Survey release.

IMPROVEMENTS AND NEW FEATURES

This release includes the following improvements and new features:

USER ADMINISTRATION FEEDBACK

- **Security User button disabled/enabled in user details modal:**
In previous releases, the Make Security Admin button was always enabled by default, which could have led to inaccurate assignment of security administration privileges. In this release, the Make Security Admin button in the user details modal is dynamically enabled or disabled based on the location and project data associated with the user.
- **User Admin - Observation on Location:** For clarity, the screens display the location prominently near the profile editing section. The software accurately retrieves users from the relevant client location during profile editing.

GUESTSCOPE - ENHANCEMENT

- **New GUESTScope Dashboard - Observation- Key opportunities:** A tooltip or visual indicator was added on the Key Opportunities section of the New GUESTScope Dashboard to clearly indicate the displayed date ranges of cached data for multiple properties. This information was made visible on the tile in the At a Glance section and informs users that they can change the date options for this data if desired.
- **New GUESTScope Dashboard- Page Loading Issues in staging:**
Smooth page transitions were ensured in the New GUESTScope Dashboard application to prevent users from encountering blank pages when navigating to the survey result screen.

HELP US IMPROVE

We value your input and want to hear from you! As we continue to enhance Unifocus products, we invite you to share your questions, suggestions, and feedback with us. If you have any thoughts or ideas on how we can improve our products, please don't hesitate to reach out to us at product@unifocus.com.
