## Overview

This document contains release notes for the latest Survey release.

## Improvements and new features

This release includes the following improvements and new features:

### USER ADMINISTRATION

- **User Administration performance improvement:** Issues reported with the User Administration screen after the last update have been addressed. Users previously experienced a persistent spinning wheel and were unable to perform any actions due to a system timeout. These problems have now been resolved, ensuring smoother and more reliable access.

### Q2-GUESTSCOPE ENHANCEMENT

- **New GUESTScope Dashboard - Comment Window:** The GUESTScope Dashboard's comment window has been improved to include the location of the comment for enhanced clarity and context, even when only one property is selected. Additionally, the property name, along with the guest name and dates, is now displayed to meet user requests for more comprehensive information.

## Fixed issues

- **User Administration - Corrected Security User checkbox display issue:** In some instances of previous releases, the Security User checkbox did not visually retain its selected status after security user permissions were assigned. Despite successful permission assignment, the checkbox did not reflect the change. This visual confirmation issue has now been corrected, ensuring clear and accurate settings management.
- **User Administration- Assign To is field is now showing the selected Location:** In some instances of previous releases, the Assign To field be displayed the selected location. This issue has been resolved so that the Assign To field now displays the name of the assigned user, as expected.

## Help us improve

We value your input and want to hear from you! As we continue to enhance Unifocus products, we invite you to share your questions, suggestions, and feedback with us. If you have any thoughts or ideas on how we can improve our products, please don't hesitate to reach out to us at [product@unifocus.com](mailto:product@unifocus.com).
